

# JOPPA CEMENT PLANT

## FACT SHEET

### WHO WE ARE

The Joppa cement plant is located in Illinois and was constructed in 1963. The plant supplies cement along the Ohio and Mississippi Rivers from Minneapolis to the Gulf of Mexico and as far east as Pittsburgh. Joppa Plant produces the highest quality oil well cements in the market.

- 62 employees
- 500,000 metric tons of cement produced annually
- Safety-first culture, the importance of safe behaviors and a safety mindset is constantly emphasized as the highest priority, with the goal of zero harm to people
- Community-focused approach, supporting local organizations and events, including cleanups for the Ohio River and the Living Lands & Waters River

### ENVIRONMENTAL COMMITMENT

The Joppa facility utilizes tires as part of the plant Alternative Fuels program. It also operates a Selective Catalytic Reducer (SCR) to help control emissions. Other environmental sustainability initiatives include:

- Receiving Wildlife Habitat Council Certification
- Participating in controlled burns by the Illinois Department of Natural Resources to manage the natural area in Southern Illinois
- Contributing to Kentucky Waterways Alliance for Pocketbook mussels

### BUILDING PROGRESS FOR PEOPLE AND PLANET

As part of Holcim US, we play an essential role in accelerating our world's transition to a net zero and inclusive future. Together, we all stand for the following:

- Making cities greener
- Empowering society with smarter infrastructure
- Becoming a net zero company
- Improving living standards for all
- Building more with less
