

# PAULDING CEMENT PLANT

## FACT SHEET

### WHO WE ARE

The Paulding (OH) cement plant first began operations in 1956 and its continued success is founded on an unwavering commitment to excellence. The facility supplies markets in Ohio, Indiana, Michigan and Illinois.

- 84 employees
- 500,000 metric tons of cement produced annually
- Safety-first culture, the importance of safe behaviors and a safety mindset is constantly emphasized as the highest priority, with the goal of zero harm to people
- Community-focused approach, supporting local organizations and events, including the Ohio Environmental Education Council and funding several programs at Paulding High School

### ENVIRONMENTAL COMMITMENT

The Paulding plant operates with the highest level of alternative fuel replacement in the world. Other environmental sustainability initiatives include:

- On-site Systech operations, which provide the facility with fuel quality wastes
- Operating in compliance with HWC-MACT
- Enabling more than 95% of the plant's thermal energy requirements to come from fuel quality wastes

### BUILDING PROGRESS FOR PEOPLE AND PLANET

As part of Holcim US, we play an essential role in accelerating our world's transition to a net zero and inclusive future. Together, we all stand for the following:

- Making cities greener
- Empowering society with smarter infrastructure
- Becoming a net zero company
- Improving living standards for all
- Building more with less
