

Rainbow Mortamix® Custom Color Cements

COLOR SPECIFIER

Samples of Holcim Rainbow Mortamix Custom Color Cements are available for use in making architectural sample panels. All standard and custom colors are available in either masonry cement or cement-lime blends in types N, S, or M, or mortar cement in type S. Full bags (enough for a 150-brick panel), half bags or one-gallon buckets (for a 20 brick panel) can be shipped within 72 hours. Three-eighths inch hardened mortar strips made with either standard laboratory sand or your job sand are also available.

Disclaimer for Holcim Rainbow Mortamix® Custom Color Cements: Holcim strives to accurately reproduce the mortar color samples provided; however, due to normal printing limitations and viewing environment lighting, these samples may not accurately reflect the exact shade or color hue of an in-place mortar on your job. Finished mortar color, hue and/or shade is influenced by job site sand, masonry units used, weather, cleaning and construction practice. Holcim always recommends that a job-specific sample panel be erected using the same sand, masonry units, and construction practice used on your project. Sample panels should be erected and approved prior to making any final color selection.

Warning: Do not use acid-based cleaners on surfaces constructed with this product. For best results, use an industrial strength detergent and clean water.
